

## Packet latency histograms

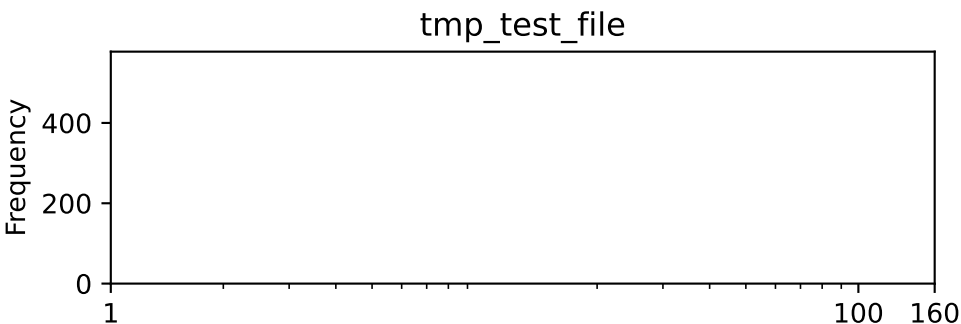

Packet statistics (assuming 160 ms cutoff):

0.0% (0 packets) totally dropped

0.0% (0 packets) totally dropped or delayed

0.0% consecutive pairs of packets dropped/delayed  
(out-of-order packets ignored)

0.0% consecutive pairs of packets dropped/delayed  
(packets reordered)

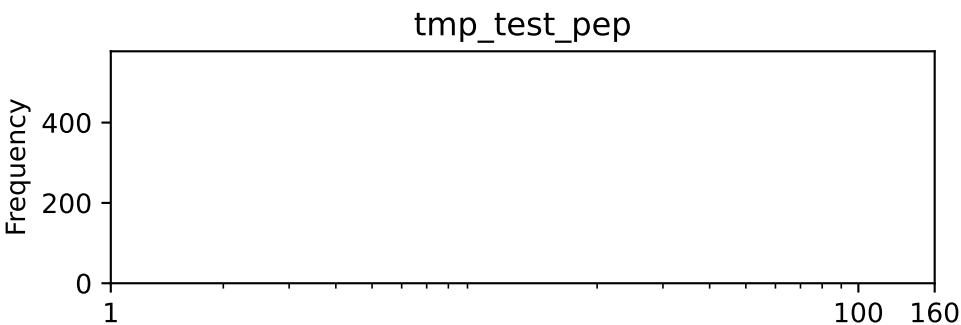

Packet statistics (assuming 160 ms cutoff):

0.0% (0 packets) totally dropped

0.0% (0 packets) totally dropped or delayed

0.0% consecutive pairs of packets dropped/delayed  
(out-of-order packets ignored)

0.0% consecutive pairs of packets dropped/delayed  
(packets reordered)

Packet statistics (assuming 160 ms cutoff):

0.0% (0 packets) totally dropped

0.0% (0 packets) totally dropped or delayed

0.0% consecutive pairs of packets dropped/delayed  
(out-of-order packets ignored)

0.0% consecutive pairs of packets dropped/delayed  
(packets reordered)
